HILTON SANDESTIN RESORT & SPA | MIRAMAR BEACH, FLORIDA

JUNE 19-23, 2024

2024

Welcome to the Gulf Coast Dental Conference - the largest dental meeting on the Gulf Coast. ALDA President Dr. Mary Wallace and her family invite you to join us for this exciting event!

Dentists and members of the dental team from across the country will gather on the beautiful Gulf Coast for nearly 80 hours of unsurpassed continuing education served with southern hospitality. Networking

Mary & David Wallace

A Regional Dental Conference

Continuing Education that focuses on clinical growth and practice success served with Southern hospitality

opportunities abound with a two-day Exhibit Show featuring over 100 commercial exhibits and numerous social events, entertainment and family-fun outings.

It's the perfect mix of business and pleasure! Bring your family, friends and office staff for this valuable opportunity to learn and connect!

OUR FOCUS IS ON YOU AND YOUR TEAM!

The GCDC focuses on clinical growth and practice success for:

- ✓ General Dentists
- ✓ Specialists
- ✓ New Dentists
- ✓ Dental Students
- ✓ Hygienists
- ✓ Dental Assistants
- ✓ Lab Technicians
- ✓ Office Managers

REGISTRATION

Register Online at gulfcoastdentalconference.org.

Register early to receive lower registration fees and ticket prices. Name badges and tickets for pre-registered attendees will be mailed to the primary registrant (dentist) two weeks prior to the meeting. Registration packets (including name badges and tickets) can be picked up at the Registration Pick-Up Desk onsite for all attendees who register after June 1. Online registration will remain open through the meeting. There will be an onsite registration kiosk available to purchase tickets or make changes to your registration. A Help Desk will be located at registration for any help you may need. Name badges will be required for admittance to all events and the Exhibit Show. Registration Pick-Up Desk and Help Desk hours are as follows:

June 19, 8:00 am - 3:30 pm

June 21, 8:00 am - 3:30 pm

June 20, 8:00 am - 3:30 pm

June 22, 8:00 am - 10:00 am

In addition to the meeting registration fee, appropriate fees for certain courses or activities will apply. There is no meeting registration fee for spouses, children or non-dentist guests.

BREAKING THE CHAIN: MASTERING INFECTION CONTROL BASICS AND MAINTAINING WATER AND SUCTION LINES FOR OPTIMAL SAFETY

Wednesday, June 19 | 9:00 am - Noon

Event Code: INF Fee: \$129/179* per dentist or staff member

*Registration increases after May 1

This course is recommended for the entire dental team

Amanda Hill, BSDH, RDH

Award-winning author and enthusiastic speaker Amanda Hill is committed to providing education that is accurate, accessible, and fun! From coast-to-coast, her speaking programs attract and delight audiences with her infectious enthusiasm and compelling content. Amanda is a frequent contributor to many industry publications. She is the recipient of OSAP's Emerging Infection Control Leader Award (2022). She is also a member of the advisory boards for RDH magazine, Dentistry IQ, and OSAP's Infection Control in Practice Editorial Review Board. She is an educator for the nation's largest dental job board.

COURSE DESCRIPTION

Ensuring infection control compliance can be challenging for many practices. From remaining current with regulations, providing proper team training, maintaining cleanliness and sterilization standards, including dental unit waterline maintenance, managing costs, and implementing effective communication and documentation processes, preventing exposure to pathogens is one of the most important and challenging tasks faced by dental professionals.

Noncompliance with dental infection control protocols is not an option and can have serious consequences, leading to loss of patients and revenue.

LEARNING OBJECTIVES

- ✓ Define infection prevention principles and recommendations
- ✓ Prevent transmission of infectious agents through standard precautions
- ✓ Employ standard operating procedures to remain in compliance with regulation
- ✓ Formulate a successful dental unit waterline protocol
- ✓ Manage a successful infection control plan

EDUCATIONAL METHODS Lecture and Digital Presentation

FROM STANDARD TO STELLAR: ELEVATING DENTAL CARE

Wednesday, June 19 | 1:30 - 4:30 pm

Event Code: HIL Fee: No Charge

This course is recommended for the entire dental team

Amanda Hill, BSDH, RDH

COURSE DESCRIPTION

Is the standard of care we learned in school enough? Staying up to date with the latest innovations can be a challenge for healthcare providers who must prioritize both the quality of care provided to their patients and their own wellbeing. In this course, Participants will assess new technologies to enhance clinical care and optimize outcomes. Learn how to explain the advantages of these new innovations to both patients and team members, resulting in greater buy-in and implementation in the practice.

LEARNING OBJECTIVES

- ✓ Discuss Dentistry 3.0 and identify steps to get the entire team on board
- ✓ Integrate co-diagnosis into patient assessment
- ✓ Evaluate new innovations that elevate clinical care

DENTISTRY'S NEXT GREAT FRONTIER: INTEGRATIVE DENTAL MEDICINE (IDM) PART 1

MORNING SESSION

Wednesday, June 19 | 9:00 am - Noon

Event Code: DW1 Fee: No Charge

PART 2

AFTERNOON SESSION

Wednesday, June 19 | 1:30 - 4:30 pm

Event Code: DW2 Fee: No Charge

This course is recommended for the entire dental team

DeWitt Wilkerson, DMD

Dr. DeWitt "Witt" Wilkerson joined Dr. Peter Dawson's private practice in 1982, where he is a partner. This has provided invaluable clinical experience in a world renowned clinical culture. Witt lectures worldwide on the subjects of restorative dentistry, dental occlusion, temporomandibular disorders, airway/

dental sleep medicine, and integrative dental medicine. He serves as a Senior Faculty/Lecturer and Director of Dental Medicine with the Dawson Academy and has provided 600+ days of lectures and hands on instruction to over 4,000 dentists. He is founder and CEO of IDM (Integrative Dental Medicine) Scholar Society, Past-President of the American Academy of Oral Systemic Health (AAOSH), Past President of the American Equilibration Society (AES), Adjunct Professor of Graduate Studies, the University of Florida College of Dentistry, and former Associate Faculty and current Special Lecturer, the L.D. Pankey Institute. Dr. Wilkerson is a member of ADA, FDA, AARD, Dental Advisory Council, and the Christian Medical & Dental Associations.

COURSE DESCRIPTION

IDM emphasizes the golden opportunity for dental professionals to gain the knowledge and skills to begin addressing the dental patient's complete health, caring for the whole person preventatively, not just treating disease as it occurs. Drawing from scientific research, this presentation will expand your influence as a true specialist in oral medicine. You will learn the common links between bruxism, dental wear and malocclusion, headaches, dysfunctional breathing, sleep apnea, gastric reflux, ADHD and TMD that are rarely recognized in the medical community. Dr. Wilkerson has authored the book, "The Shift, The Dramatic Movement Toward Health Centered Dentistry," which details an exciting future for our great profession. Come prepared to experience The Shift personally, as we explore the possibilities for creating the most respected specialty in all of medicine... Dentistry!

LEARNING OBJECTIVES

- ✓ Each participant will receive the IDM Checklist to utilize as a chairside guide to evaluation, diagnosis, and treatment
- ✓ Each participant will learn the three pillars of IDM that guide an understanding of cause and effect relationships in diagnosis and treatment

Howard Glazer, DDS, FAGD

Dr. Glazer is a Fellow and Past President of the Academy of General Dentistry, and former Assistant Clinical Professor in Dentistry at the Albert Einstein College of Medicine (Bronx, NY). He is a Fellow of the American College of Dentists; International

College of Dentists; American Society for Dental Aesthetics, the American Academy of Forensic Sciences, and a Diplomate of the American Board of Aesthetic Dentistry. Dr. Glazer is an attending dentist at the Englewood Hospital (Englewood, NJ). Dr. Glazer is the Deputy Chief Forensic Dental Consultant to the Office of Chief Medical Examiner, City of New York.

Dr. Glazer has been named as one of the "Leading Clinicians in Continuing Education" by "Dentistry Today", and was named as one of the Top Dentists in New Jersey by "New Jersey Monthly, 201 Magazine", and "Bergen Magazine". He lectures throughout the United States, Canada, and overseas, on the subject of dental materials, cosmetic dentistry, forensic dentistry and patient management.

COURSE DESCRIPTION

This program is about real dentistry for real people by a real dentist! You will learn the various aspects of moving from reparative dentistry to restorative dentistry. Dr. Glazer will present a potpourri of the materials and techniques that he uses to make the day more productive, easier and fun. Dr. Glazer's bi-monthly column by the same title appears in "Dental Economics" magazine where he reviews new products and materials.

LEARNING OBJECTIVES

- ✓ Learn the different types of materials in various product categories
- ✓ Learn what is faster, easier, and better
- ✓ Understand the value of continual doctor/patient communication and management apps
- ✓ Understand how to utilize many of the newer bioactive/biomimicry materials that move us from reparative dentistry to restorative dentistry

THURSDAY, JUNE 20

FORENSIC ODONTOLOGY: TV vs. REALITY

Thursday, June 20 | 1:30 - 4:30 pm

Event Code: HG2 Fee: No Charge

This course is recommended for the entire dental team

Howard Glazer, DDS, FAGD

COURSE DESCRIPTION

The objective of this presentation is to familiarize the audience with the history and development of forensic odontology as modern-day science. The need, role, and responsibility of the forensic odontologist in both civil and criminal matters will be discussed along with demonstrative cases.

The presentation will discuss the various responsibilities of the forensic odontologist and the interaction with police, fire, and judicial agencies. Mass disaster team organization and the process for identification of victims will be reviewed and highlighted.

Recent multiple fatality victim identification incidents including the Happyland Social Club Fire will be discussed along with the crash of US Air Flight 405 at LaGuardia Airport, and the collision of two aircraft over Burlington County (NJ) that claimed the lives of 11 persons; recent helicopter and bus crashes in NYC, as well as the American Airlines Flight 587 and NYC's largest mass murder, the infamous World Trade Center disaster will also be presented.

LEARNING OBJECTIVES

- ✓ Understand the role and responsibilities of the Forensic Odontologist
- ✓ Establish a protocol for, and to better understand how to organize a dental identification team for multiple fatality incidents

THE SINGLE UNIT CROWN: MAXIMIZING EFFICIENCY AND FOCUSING ON LONGEVITY

Thursday, June 20 | 9:00 am - Noon

Event Code: NC1 Fee: No Charge

Sponsored by Dentsply Sirona Restorative

This course is recommended for the entire dental team**Nicholas R. Conte Jr., DMD, MBA**

Dr. Nick Conte is a prosthodontist who has spent 25 years in dentistry working in a variety of roles spanning private practice, academia, industry, and public health. Nick has previously served as the Director of Clinical Research and Clinical Education for Dentsply Sirona Restorative. Dr. Conte earned a BA from the University of Rochester (NY) in Health Economics and completed both his DMD degree and his Prosthodontic Residency Program at the University of Medicine and Dentistry of New Jersey, now Rutgers School of Dental Medicine (NJ). In addition, Nick earned an MBA from Wilmington University (DE). He currently holds a faculty appointment as a Clinical Assistant Professor at Rutgers School of Dental Medicine and is a fellow in the American College of Dentists and a member of the American Society of Forensic Odontology. Nick enjoys lecturing on dental materials, procedural based clinical solutions and team focused office efficiency.

COURSE DESCRIPTION

The single-unit crown procedure has a significant impact on office workflow and office productivity. By addressing the critical steps in the single-unit crown procedure, clinicians can deliver greater efficiency, more predictable clinical outcomes, enhance auxiliary staff usage, and improve overall patient satisfaction.

To achieve a strong foundation and long-term success, clinicians need a solution that simplifies the steps within the procedure of preparation, provisionalization, tissue management, impression-making, and definitive cementation. Tooth preparation techniques will be discussed, including recommendations for all zirconia-based restorations. The importance of the provisional restoration including material selection, fabrication technique and interim cementation will be highlighted. Troubleshooting of common problems encountered in tissue management and during recording of a final impression will be presented and definitive cement selection will be reviewed. Utilizing a case-based approach, the steps of the single unit crown procedure will be analyzed to help provide a complete solution for overall restoration success, reliability, and longevity.

LEARNING OBJECTIVES

- ✓ Current preparation design with emphasis on matching design with substrate
- ✓ Relate the importance of the provisional restoration to a long-lasting definitive crown

- ✓ Provisional crown fabrication and provisional cement options
- ✓ Current tissue management techniques and new material
- ✓ Proper impression-making procedures
- ✓ Definitive cementation options with emphasis on matching cement selection to clinical condition

EDUCATIONAL METHODS Lecture and Digital Presentation**3 CEUs****THE KEYS TO EFFICIENTLY CREATING FUNCTIONAL, ESTHETIC AND LONG-LASTING COMPOSITE RESTORATIONS**

Thursday, June 20 | 1:30 - 4:30 pm

Event Code: NC2 Fee: No Charge

Sponsored by Dentsply Sirona Restorative

*This course is recommended for the entire dental team***Nicholas R. Conte Jr., DMD, MBA****COURSE DESCRIPTION**

Dentists often struggle with placement techniques, options for consistently generating ideal inter-proximal contact and postoperative sensitivity. There are several key elements that will determine the success of direct composite restorations including tooth preparation, material choice, as well as both placement technique and curing method. Each element plays a critical role in the professional's decision-making process when determining which materials, systems and techniques are best to utilize. This program will review modern preparation design and how best to approach adhesion based on clinical circumstances. Focus will include quadrant-based efficiency, generating consistently tight interproximal contacts and, what is most important during light curing. Additional topics will include proper composite selection and placement techniques, anatomical contouring, finishing, and polishing, all of which are essential clinical components to achieving long lasting esthetic restorations.

LEARNING OBJECTIVES

- ✓ The latest techniques on conservative preparation design
- ✓ Indications for direct composites restorations
- ✓ Technique tips for efficient isolation and generating ideal anatomic interproximal contacts
- ✓ Understanding of adhesion, current products, and their function in modern day dentistry
- ✓ Insight into light curing and importance of operator variability
- ✓ Techniques for handling and placement of modern composites
- ✓ Polishing and sealing techniques for long term durability

EDUCATIONAL METHODS Lecture and Digital Presentation**3 CEUs****IRON OUT YOUR COMMUNICATIONS**

Thursday, June 20 | 9:00 - Noon

Event Code: LC1 Fee: No Charge

This course is recommended for the entire dental team**Lisa Copeland, RDH, CSP, CVP**

Lisa Copeland is a healthcare expert, author, global speaker, public speaking coach, and passionate RDH with vast experience in the dental industry. Using generational communication strategies and refined language skills, she coaches teams to improve their profit, performance, and productivity.

COURSE DESCRIPTION

Words have power and can greatly impact the success of a business or organization. By disrupting patterns of expectation and communicating in a more personalized and customized way, you can build trust with patients and cultivate loyalty and referrals. Effective communication is essential in any industry, but especially in healthcare where patient trust and satisfaction are crucial. By utilizing the iRONMAN Principles, Lisa aims to help dentists transform their practices into elite organizations that provide exceptional care and service to their patients. Lisa's interactive style pushes audiences through an exhilarating experience that guarantees to elevate your practice to the iRONMAN level.

LEARNING OBJECTIVES

- ✓ Apply iRONMAN Principles to lead and empower both teams and patients, resulting in a more positive workplace
- ✓ Implement seven (7) simple communication strategies that help to achieve practice wellness
- ✓ Develop top-notch inter team communication skills that drive successful teams and loyal patients

EDUCATIONAL METHODS Lecture and Digital Presentation**3 CEUs**

THURSDAY, JUNE 20

GENERATIONAL JEOPARDY: MASTERING ATTRACTION AND RETENTION STRATEGIES ACROSS AGES

Thursday, June 20 | 1:30 pm - 4:30 pm

Event Code: LC2 Fee: No Charge

*This course is recommended for the entire dental team***Lisa Copeland, RDH, CSP, CVP****COURSE DESCRIPTION**

Are your patient and team member experiences meeting generational expectations? The shift from product-centric to people-centric means younger generations expect ongoing coaching, mentorship and upskilling. Speaking the right generational language can reduce team turnover and attract new employees. Practices have four generations in their workforce, and generational friction can hurt the practice. To bridge the divide, everyone must recognize and embrace generational differences. Dental practices must master mobile platforms to accommodate smartphone communication demands and stay competitive. Attendees will learn how to identify generational markers and reduce friction points to improve practice culture. Magic happens when we connect beyond our professional roles and support our differences.

LEARNING OBJECTIVES

- ✓ Cultivate a generationally perceptive practice to create desirable employee experiences
- ✓ Utilize onboarding as a tool for connection and retention.
- ✓ Implement high-level generational communication and marketing strategies
- ✓ Devise tactics to improve chronic turnover, low engagement, and stagnant/declining production

EDUCATIONAL METHODS Lecture and Digital Presentation**3 CEUs****THE CHRISTENSEN BOTTOM LINE PART 1 MORNING SESSION**

PART 2 AFTERNOON SESSION

Friday, June 21 | 1:30 - 4:30 pm

Event Code: GC2 Fee: No Charge

This course is recommended for the entire dental team**Gordon J Christensen, DDS, MSD, PhD**

Dr. Gordon Christensen is Founder and Chief Executive Officer of Practical Clinical Courses (PCC), Senior Consultant and previous CEO of Clinicians Report Foundation (CR), and a practicing prosthodontist in Provo, Utah. Gordon and Dr. Rella

Christensen are co-founders of the non-profit Clinicians Report Foundation. Since 1976, they have conducted research in all areas of dentistry and published the findings to the profession in the well-known CRA Newsletter now called "Clinicians Report". Gordon's degrees include: DDS, University of Southern California; MSD, University of Washington; PhD, University of Denver; and two honorary doctorates. Gordon helped initiate the University of Kentucky and University of Colorado dental schools and taught at the University of Washington. Currently, he is an Adjunct Professor at the University of Utah School of Dentistry.

COURSE DESCRIPTION

This fast moving "bottom line" course includes the areas of dentistry with the most activity and change in any given year. It is easily understood and has numerous summaries that help attendees to interpret the ongoing advancements in the profession. The course encourages audience participation, and is presented in an enjoyable and humorous manner.

This course will cover the following topics: State of the Profession; Lasers; Diagnosis and Treatment; Occlusion; Esthetic Dentistry; Operative Dentistry; Implant Dentistry; Practice Management; Laboratory Technology; and Technology.

LEARNING OBJECTIVES

- ✓ Learn the most important and useful new concepts discussed in this course
- ✓ Implement those aspects of the course most applicable to your practice

EDUCATIONAL METHODS Lecture and Digital Presentation**3 CEUs Part 1****3 CEUs Part 2**

*Sponsored by the Alabama Association of Endodontists**This course is recommended for dentists***Mohamed I Fayad, DDS, MS, PhD**

Dr. Mo Fayad received his DDS (1985) from the College of Dentistry, Cairo University, his Masters in Oral Sciences (1994) from the University of Buffalo (NY), his PhD (1996) from the University of Buffalo and Cairo University, and his Endodontic training

at the college of Dentistry at UIC. Currently, he is the Director of Endodontic Research, and a Clinical Associate Professor in the endodontic department. He currently serves on the Scientific Advisory and Manuscript Review Panels of the *Journal of Endodontics*, and *Evidence Based Endodontics Journal*.

Dr. Fayad served on the AAE Research and Scientific Affairs Committee and he has numerous publications and chapters in peer reviewed journals and textbooks. He is a recipient of the Calvin D. Torneck Part-Time Educator Award (2022) by the American Association of Endodontists, and a Diplomate of the American Board of Endodontics.

COURSE DESCRIPTION

Several endodontic technologies have been introduced, including CBCT, dental lasers, AI softwares and dynamic navigation. Importing CBCT dicom files into e-VOLDx artificial intelligence (AI) software and dynamic navigation systems have added a new dimension to diagnosis and treatment. The incorporation of CBCT technology and new imaging software has provided clinicians with 300 times higher resolution and the ability to visualize dental structures clinicians were not able to visualize in the past. These technologies can be utilized in challenging endodontic procedures.

LEARNING OBJECTIVES

- ✓ Import CBCT dicom images into e-VOLDX AI Software
- ✓ Understand the different wave lengths available in laser technologies and its different applications
- ✓ Apply the dynamic navigation with Scopeye display in minimally invasive endodontic procedures

EDUCATIONAL METHODS Lecture and Digital Presentation**3 CEUs Part 1 3 CEUs Part 2**

FRIDAY, JUNE 21

TOGETHER CREATING LIFE CHANGING SMILES

Friday, June 21 | 1:30 - 4:30 pm

Event Code: AT1 Fee: No Charge

This course is recommended for the entire dental team

Arthur "Tony" Tomaro

Dr. Tony Tomaro is a recognized academician and clinician, an accomplished author, and lectures nationally and internationally. His lectures emphasize the same concepts he practices: comprehensive dental health exams, diagnosis, and

treatment plans; conservative esthetic dentistry and materials; smile design; evaluation, diagnosis, and restoration of worn dentition; and financial success (learned skills growing up in a family business). Dr. Tomaro lectures on aesthetic dentistry and his unique process for natural smile design.

Dr. Tomaro received his DDS (1980) from University of Michigan and previously his BS and MS in Biology and Histology there. He enjoyed 26 years of private practice in Grand Rapids, MI and then relocated to become the Director of Clinics at the Las Vegas Institute and he opened a private practice there in 2008.

Dr. Tomaro is known for his style of veneers-smile design. Using facial landmarks to dictate tooth position can both enhance esthetics and conserve tooth structure. Each porcelain veneer is handmade by Dr. Tomaro's personal ceramist who custom-blends the porcelain according to the patient's desire and Dr. Tomaro's direction for a natural-looking finish. No two patients have the same smile. Thus, many Las Vegas celebrities and performers have sought Dr. Tomaro to create their new smile.

COURSE DESCRIPTION

Smile design is a science and an art. Success and beauty is created in proper clinical planning. Dr. Tomaro will take you through the clinical steps necessary to create the beauty that your patients are seeking. Proper diagnosis and patient selection are the keys to success. Evaluation of the smile corridor; facial analysis; occlusal evaluation; communicating with the laboratory technician (after all they make us look good); diagnostic wax-up; and the clinical steps to adhesion will be discussed.

LEARNING OBJECTIVES

- ✓ The role of "the golden proportion" in smile design
- ✓ The rules of smile design
- ✓ The laboratory technician duplicates nature
- ✓ Understanding adhesion

Saturday, June 22 | 9:00 am - Noon

Event Code: TEA Fee: No Charge

This course is recommended for the entire dental team

Consuela Teague

Consuela Teague has been an integral part of the teacher training program at June Shelton School and Evaluation Center since 2012, educating educators, parents, and community members to support individuals with learning differences.

As the Programs Associate, Consuela specializes in providing instructional training tailored to the unique needs of diverse learners.

COURSE DESCRIPTION

This seminar provides a comprehensive overview of learning differences, including dyslexia, ADHD, dysgraphia, dyscalculia, expressive and receptive language disorders, and executive functioning disorders. Participants will learn common characteristics of these learning differences and practical strategies to enhance patient care. Ms. Teague will engage dental professionals in a series of simulation activities to better understand the neurodivergent experience. Through the simulations and interactive discussion, participants will gain valuable insights and learn practical strategies to create a more inclusive dental practice environment. The goal is to deepen empathy and support by understanding these challenges firsthand. This is a unique opportunity to "put yourself in their shoes."

LEARNING OBJECTIVES

- ✓ The characteristics and impact of learning differences
- ✓ Learn effective communication strategies for interacting with patients and staff with learning differences
- ✓ Reflect upon ways to create a supportive, neurodivergent-friendly environment

APPLICATION OF ARTIFICIAL INTELLIGENCE IN RESTORATIVE DENTISTRY

Saturday, June 22 | 9:00 am - Noon

Event Code: AT2 Fee: No Charge

This course is recommended for the entire dental team

Arthur "Tony" Tomaro

See bio on page 8.

COURSE DESCRIPTION

AI is the new buzzword in almost every aspect of our world. What is Artificial Intelligence (AI) and what role does it play in dentistry? Dr. Tomaro will share with attendees how AI is changing dentistry. We will learn the daily application of AI in the dental office, and how both providers and patients will benefit.

LEARNING OBJECTIVES

- ✓ Understand what AI is
- ✓ The role AI will play in the future of dentistry
- ✓ The application of AI in today's dental office
- ✓ How AI impacts the financial bottom line

Sponsored by Dentsply Sirona Restorative

This course is recommended for the entire dental team

Marianne Dryer RDH, MEd

Marianne Dryer is a dynamic speaker, educator and corporate consultant. She has lectured nationally and internationally on periodontal instrumentation with a focus on ultrasonic technique, risk assessment, infection prevention and radiology technique. Her experience in dentistry spans over 30 years. She is a graduate of Forsyth School for Dental Hygienists, Old Dominion University and received her Masters in Education from St Joseph's College (ME). Marianne was the first year coordinator at Collin College (TX), where she received the Outstanding Faculty Award and was nominated for the Advisor of the Year. She has been a faculty member at Cape Cod Community College since 2007, and Program Director since 2019. Marianne is also a Periodontal Instrumentation Instructor for DH Methods of Education, Inc., an educational program for dental and dental hygiene faculty. She has been a strong advocate for introducing ultrasonic instrumentation into dental hygiene curriculums.

COURSE DESCRIPTION

This course examines the need for proper foundational skills in ultrasonic instrumentation. A review of proper adaptation, angulation and adaptation will be discussed, along with ultrasonic insert selection. Attendees will acquire a deeper understanding of how the technology works for optimum clinical results. A focus will be on biofilm disruption with both ultrasonic and traditional air polishing. Maintenance of ultrasonic inserts and tips will be discussed, along with optimum water management and individual patient considerations.

LEARNING OBJECTIVES

- ✓ Discuss Oral Disease Status
- ✓ Review Ultrasonic Technique and Technology
- ✓ Compare and contrast standard, slim and modified curved inserts
- ✓ Select inserts/tips for various types of deposit removal
- ✓ Evaluate air polishing technologies utilized today
- ✓ Identify proper maintenance and sterilization protocol

Ticketed Event

FREQUENTLY ASKED QUESTIONS

What are the Benefits of Pre-Registration?

By registering before April 30, you receive the lowest registration fees and ticket prices. An asterisk (*) indicates the increased event fee if you register after May 1 (Mail in registration forms must be postmarked by May 1). Early pre-registration also ensures participation in limited ticket events.

How Can I Pre-Register?

Online Registration – Online pre-registration will be available through June 18. Visit gulfcoastdentalconference.org to register.

When Will I Receive Badges and Tickets?

Name badges for pre-registered attendees will be mailed to the primary registrant (dentist) two weeks prior to the conference – please be sure to bring these materials with you to the conference. All tickets are included on the name badge via bar code. Registration packets will be distributed on-site for all attendees who register after May 20. Name badges will be required for admittance to all events and the Exhibit Show.

What Are the Registration/Check-In Hours On-Site?

June 19, 8:00 am - 3:30 pm
June 20, 8:00 am - 3:30 pm
June 21, 8:00 am - 3:30 pm
June 22, 8:00 - 10:00 am

How Much Does It Cost to Attend Each Seminar?

Courses that appear in the brochure with a fee of no charge are covered by the general registration fee for dentists and dental staff. There is no general registration fee for spouses, children or non-dentist guests.

There are additional fees for some courses and events. These fees are listed near the course or event title in this brochure.

How Do I Become an ALDA Member So I Can Take Advantage of Reduced Registration Fees?

A reduced registration fee is just one of the many advantages of ADA and State Association membership. For membership information, please contact ALDA at (800) 489-2532 or email membership@aldaonline.org.

How Do I Know Which Courses Are Right for Me?

Recommendations on appropriate attendees are noted in the brochure with each course description.

How Do I Record My CE hours?

The Gulf Coast Dental Conference (GCDC) records all conference data digitally. Manual continuing education rosters are no longer used at the Gulf Coast Dental Conference. Designated conference staff will scan attendee badges for all clinical sessions. Attendees must be present to be scanned. Scanning times can vary depending on the conference schedule. Once the presentation has concluded, scanning for that class will no longer be available.

CE certificates and other materials will be provided on-site. It is your responsibility to record CE hours and keep the certificate as proper verification of your attendance for your records. Most courses qualify for continuing education credit accepted by the Board of Dental Examiners of Alabama. The number of CE hours (CEUs) is noted following each course. Most courses qualify for AGD PACE credit as well.
